

## Is this source academically reliable?

A resource created by Sam Sawant for The Write Place

- **Did you obtain the article from a credible database (JSTOR, PubMed, PsycINFO)?**
  - Using the Western Libraries website also pulls journal articles from credible databases:  
[www.lib.uwo.ca](http://www.lib.uwo.ca)
- **How old is the source?**
  - In subjects within the social sciences (Psychology, Sociology etc.) picking sources within 5-10 years is ideal; however, subjects in humanities (English, Philosophy) sometimes require sources that are much older.
- **Is the article peer reviewed?**
- **Is the article part of a credible journal? Or published by a credible source?**
- **Is the information presented in the article backed up with evidence?**
- **Are arguments one-sided with no acknowledgment of other viewpoints?**
- **Can you find similar ideas/claims in other articles?**
  - Checking the references of your article can lead you to similar material by other authors.
