In January 2010, The New York Times, investigating changes at the University of Toronto’s Rotman School of Management, reported on a “radical idea in business education: that students needed to learn how to think critically and creatively every bit as much as they needed to learn finance or accounting. More specifically, they needed to learn how to approach problems from many perspectives and to combine various approaches to find innovative solutions.”

WHAT CAN YOU DO WITH AN ENGLISH DEGREE?

English graduates are prepared for a variety of professions. In the fast-paced and changing career dynamics of the 21st century, the skills learned in reading literary and critical texts are integral to success in our knowledge-based economy.
