

## Alumni Mentorship Program

Thank you for your interest in the Alumni Mentorship Program!

While we will make every effort to connect you with a King's graduate who has experience specific to your interests, it will not always be possible to find an exact match. Please help us by providing both general and specific career interests.

It is not the purpose of the mentorship program to provide participants with jobs or internships. Our alumni have made themselves available to provide information and advice related to career interests or career exploration in general.

Remember that our alumni are providing this service on a voluntary basis, and that their time is valuable. We ask that once a mentorship match has been provided you make contact with that individual within seven days. If you do not think you will be able to fulfill that obligation, we ask that you delay your pursuit of an alumni mentor until you are more available.
