What is Sociology? Sociology is the study of society and its social problems. As a social science, Sociology gives us the tools and skills to understand and connect individual troubles, behaviors, and actions with broad social issues. Our program is grounded in principles that aim to challenge social inequality and mechanisms of social exclusion that remain in the 21st century.

A Place to Be. A Place to Become.
The Sociology program combines evidence-based research, critical analysis, and practical application in order to understand and solve social problems at the local and global levels. The program centers on the identification and formation of social structures that continue to be root causes of inequality, poverty, and displacement. Students are urged to think critically and creatively about complex issues to develop alternatives to inequity, exploitation, and discrimination.

As one of the largest programs at King’s University, sociology is proud to deliver critical, practical, active, and innovative teaching and research to help our students engage, understand, and effect change in the social world.

STUDENT AFFAIRS

Learn how to use the resources in the Cardinal Carter Library
Participate in the KUCSC sponsored events
Meet with upper year student mentors
On campus leadership
Sign up for intramurals and explore Western Mustang sporting and social events
Attend the King’s Undergraduate Research Conference
Meet with university faculty and learn about job search tools
Take part in a campus leadership programs and events.

ENGAGE In Local and Global Community

EXPERIENCE

Work with local community-based organizations
Participate locally and nationally in academic, professional or community-based organizations
Learn and develop new communication skills, including the use of social media and podcasting
Collaborate with faculty on research projects, experimental learning trips, and policy briefs

SKILLS AND COMPETENCIES:

Think critically to understand social problems
Wish to participate in local and regional experiential learning opportunities led by world-class faculty
Are interested in social problems, particularly issues related to local, regional, and global inequality and social exclusion
Want to develop, enhance, and engage advanced qualitative and quantitative research methodologies, including survey design and regression techniques, interviewing, focus groups, and ethnographic research
Are interested in expanding their understanding of complex social issues related to poverty and homelessness, drug addiction, crime, sexism, racism, colonization, disability, human security, environmental degradation, mental health, power and authority, and other forms of oppression and marginalization
Wish to participate in local and regional experiential learning opportunities led by world-class faculty

CAREER OVERVIEW

As Senior Talent Acquisition Specialist, I work with stakeholders and hiring managers to understand their hiring needs and implement sourcing strategies. I source and evaluate talent, and successfully manage large talent pools. I inform leaders and stakeholders about recruitment best practices, continually seeking out better and more effective strategies.

ALUMNI PROFILE

Sasha Kulczycki
St. Boniface, Criminology and Sociology
Graduation Year: 2016

Current Career
Senior Talent Acquisition Specialist, Info-Tech Research Group
